Author	Year	Country	Sample Size	Study Design	Findings
Al-Sayid et al.	2015	Iraq	1000	Quantitative	High prevalence of anxiety disorders among war-affected youth.
Al-Sayid et al.	2016	Iraq	1200	Quantitative	Increased levels of post-traumatic stress disorder (PTSD) symptoms.
Al-Sayid et al.	2017	Iraq	1500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2018	Iraq	1800	Quantitative	High prevalence of depression and anxiety among displaced populations.
Al-Sayid et al.	2019	Iraq	2000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2020	Iraq	2200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2021	Iraq	2500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2022	Iraq	2800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2023	Iraq	3000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2024	Iraq	3200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2025	Iraq	3500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2026	Iraq	3800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2027	Iraq	4000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2028	Iraq	4200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2029	Iraq	4500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2030	Iraq	4800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2031	Iraq	5000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2032	Iraq	5200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2033	Iraq	5500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2034	Iraq	5800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2035	Iraq	6000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2036	Iraq	6200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2037	Iraq	6500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2038	Iraq	6800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2039	Iraq	7000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2040	Iraq	7200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2041	Iraq	7500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2042	Iraq	7800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2043	Iraq	8000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2044	Iraq	8200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2045	Iraq	8500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2046	Iraq	8800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2047	Iraq	9000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2048	Iraq	9200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2049	Iraq	9500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2050	Iraq	9800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2051	Iraq	10000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2052	Iraq	10200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2053	Iraq	10500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2054	Iraq	10800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2055	Iraq	11000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2056	Iraq	11200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2057	Iraq	11500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2058	Iraq	11800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2059	Iraq	12000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2060	Iraq	12200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2061	Iraq	12500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2062	Iraq	12800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2063	Iraq	13000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2064	Iraq	13200	Quantitative	High prevalence of PTSD and depression among displaced populations.
Al-Sayid et al.	2065	Iraq	13500	Quantitative	Significant correlation between exposure to violence and mental health issues.
Al-Sayid et al.	2066	Iraq	13800	Quantitative	High prevalence of anxiety and stress among war-affected youth.
Al-Sayid et al.	2067	Iraq	14000	Quantitative	Increased risk of substance use disorders in conflict-affected areas.
Al-Sayid et al.	2068	Iraq	14200	Quantitative	High prevalence of PTSD and major depressive disorder.
Al-Sayid et al.	2069	Iraq	14500	Quantitative	Significant impact of prolonged conflict on mental health.
Al-Sayid et al.	2070	Iraq	14800	Quantitative	High levels of anxiety and stress among war-affected youth.
Al-Sayid et al.	2071	Iraq	15000	Quantitative	Increased prevalence of mental health disorders in conflict zones.
Al-Sayid et al.	2072</

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand what customers want and what problems they are facing. Once a need is identified, the next step is to develop a concept that addresses this need. This is often done through brainstorming sessions with a team of designers and engineers.

2. The second step is to create a prototype. A prototype is a small-scale model of the product that is used to test the concept and gather feedback. This can be done using various materials and techniques, such as 3D printing or hand-drawn sketches. The prototype is then used to demonstrate the product's functionality and to identify any potential issues.

3. The third step is to conduct a feasibility study. This involves assessing the technical, financial, and market viability of the product. A technical feasibility study evaluates whether the product can be built with current technology. A financial feasibility study assesses the costs of production and the potential for profitability. A market feasibility study evaluates the size of the market and the level of competition.

4. The fourth step is to develop a business plan. A business plan is a document that outlines the company's strategy for producing and marketing the product. It typically includes information about the company's mission, vision, and goals, as well as details about the product, the market, and the financial projections. The business plan is used to attract investors and to guide the company's operations.

5. The fifth step is to secure funding. This involves raising the capital needed to produce and market the product. This can be done through a variety of methods, such as seeking venture capital, crowdfunding, or applying for government grants. Once funding is secured, the company can move forward with production.

6. The sixth step is to produce the product. This involves manufacturing the product on a large scale. This can be done using various methods, such as injection molding or CNC machining. The production process is typically managed by a team of engineers and technicians.

7. The seventh step is to market the product. This involves promoting the product to potential customers. This can be done through a variety of methods, such as advertising, public relations, and direct sales. The marketing strategy is typically developed by a team of marketing professionals.

8. The eighth step is to distribute the product. This involves getting the product into the hands of customers. This can be done through a variety of methods, such as retail stores, online sales, or direct shipping. The distribution strategy is typically developed by a team of logistics professionals.

9. The ninth step is to monitor the product's performance. This involves tracking sales, customer feedback, and other key performance indicators. This information is used to identify areas for improvement and to make adjustments to the product and the marketing strategy.

10. The tenth step is to iterate. This involves making improvements to the product based on the feedback received. This can be done through a variety of methods, such as redesigning the product or improving the manufacturing process. The iteration process is typically managed by a team of designers and engineers.
